

## RGE Tech Tips from the Field – Client Edition

*Topic: Getting the Most Out of YouTube*

**Chip's Weekly Cheat Sheet: Apr-13** 🧑

**Topic: Getting the Most Out of YouTube**

### 1. The Magic "Skip" Button

- You don't always have to watch the commercials! Look for the tiny "Skip Ad" button in the bottom right corner after 5 seconds.
- **Chip's Tip: If you find an ad annoying, just look for the little "i" icon to tell YouTube to "Stop showing this ad."**

### 2. Turn on the "Captions."

- If a video is too quiet or the speaker is too fast, tap the "CC" button. It will turn on Subtitles so you can read along.
- **Chip's Tip: You can even change the text size of the captions in the settings gear icon if they are too small!**

### 3. Saving Your Favorites

- You don't have to search for the same video twice. Use the "Save" button to add it to the "Watch Later" list.
- **Chip's Tip: This is the best way to keep your favorite RGE tech videos all in one easy-to-find spot.**
