

RGE Tech Tips from the Field – Client Edition

Topic: Simple Photo Editing

Chip's Weekly Cheat Sheet: Jun-15 🎨

Topic: Simple Photo Editing

1. The "Auto-Magic" Button

- Almost every photo app has an "Auto-Enhance" button. Tap it! It usually fixes the lighting and color instantly.
- **Chip's Tip: If you don't like the change, there is always an "Undo" button. Don't be afraid to experiment!**

2. Crop Out the Clutter

- If there's a trash can or a stranger at the edge of your photo, use the "Crop" tool to trim the edges and focus on the good stuff.
- **Chip's Tip: Cropping is the easiest way to turn a "good" photo into a "great" one.**

3. Straighten Your Horizons

- If your ocean photo looks like the water is leaking out of the side, use the "Rotate" tool to level it out.
- **Chip's Tip: Most phones will show you a little "level" line to help you get it perfectly straight!**
