

RGE Tech Tips from the Field – Client Edition

Topic: *The Digital Estate*

Chip's Weekly Cheat Sheet: Oct-05 📄

Topic: The Digital Estate

1. Don't Get Locked Out

- Choose a "Legacy Contact" on your phone so your family can access your photos if something happens to you.
- **Chip's Tip: This task takes 5 minutes but saves your family months of stress trying to recover memories later.**

2. The "Digital Will."

- iPhone users can find this in **Settings > Sign-In & Security**; Google users should search for **"Inactive Account Manager."**
- **Chip's Tip: This allows you to choose exactly which folders—like Photos or Drive—your heirs can see.**

3. Share the Access Key

- Your phone will generate a special "Access Key" for your contact. Print this out and keep it with your physical will.
- **Chip's Tip: Treating your digital passwords like physical assets ensures your history is never lost to a "forgotten password."**
