

## RGE Tech Tips from the Field – Client Edition

Topic: *Photo Purge Party*

Chip's Weekly Cheat Sheet: Oct-26 🕯️

Topic: **Smart Lighting for Fall Safety**

### 1. Sunset Timers

- Use smart bulbs to ensure your outdoor and hallway lights turn on automatically as the days get shorter.
- **Chip's Tip: Smart lighting is more than a gadget; it is a vital home safety tool for preventing falls in the dark.**

### 2. Vacation Mode

- Smart plugs can turn lamps on and off at random times to make the house look occupied while you're out.
- **Chip's Tip: You can control these from your phone while visiting family in Arizona to check on your home status.**

### 3. Motion Sensors

- Place motion-sensing lights in high-traffic areas to guide you at night without fumbling for a switch.
- **Chip's Tip: This is especially helpful for guests or grandkids who may not know where your light switches are located.**
