

## RGE Tech Tips from the Field – Client Edition

*Topic: The Year in Review -- Celebrating Your Tech Wins*

### Chip's Weekly Cheat Sheet: Dec-28

#### Topic: The Year in Review: Celebrating Your Tech Wins

##### 1. Your Top 3 Successes

Think back on the technology you mastered this year—maybe it was your first AI chat, setting up your first "Easy Mode" phone, or finally performing a deep-clean on your laptop!

**Chip's Tip: Celebrate your progress! Technology is a journey of small steps, and you have gained significant digital confidence since we started in January.**

##### 2. Master the Fundamentals

The "Big Picture" of tech doesn't change as fast as the news makes it seem. By mastering your passwords, security updates, and device settings this year, you have built a solid foundation that will serve you for years to come.

**Chip's Tip: Don't worry about the "next big thing." If you understand the basics of safety and navigation, you can handle almost any new gadget that comes your way.**

##### 3. Thank You for Joining Chip!

It has been a true joy sharing these tips with you every Monday morning. We look forward to continuing our mission of building digital confidence and making technology work for you, not against you.

**Chip's Tip: If there is a specific tech topic you'd like to see covered again or explained in more detail, send us an email! We build these sheets based on what *you* want to know.**
