Jim Kallaugh

Home Tech Consultant | Setup, Troubleshooting & Training for Computers, Wi-Fi, Printers, Mobile Devices | A Boomer Helping Fellow Boomers in Middletown, CT
Middletown, Connecticut, United States

Summary

With decades of experience in IT support, I have shifted my focus to what matters most — helping everyday people understand home technology. Through Red Glen Electronics, I provide calm, step-by-step guidance that combines technical know-how with a human touch.

After working for years in the corporate, healthcare, and education sectors, I have slowed down to focus on personal projects and part-time work. I founded Red Glen Electronics as a trust-based, individual service to help Boomers confidently navigate home technology.

My background includes providing computer hardware and technical support, wireless networking, troubleshooting home networks, delivering customer support, training, and setting up devices for mobile phones and tablets. Today, I use those same skills to make digital technology easier to understand and less frustrating at home.

I offer help with everything from stubborn laptops and Wi-Fi networks that "just work" to coaching seniors so they feel confident using their devices.

Experience

Red Glen Electronics
Owner/Home Tech Consultant
January 2021 - Present (5 years 3 months)
Middletown, CT

- Volunteers at the Cromwell Senior Center offering free afternoon consulting, weekly by appointment ("Tech Tuesdays"), and conducting monthly seminars on relevant tech topics for seniors.

- Guides seniors through device setups and upgrades, reducing repeat calls with easy reference guides.
- Restores home Wi-Fi coverage in complex layouts, achieving 100% signal reliability after troubleshooting.
- Trains individuals and couples on everyday tech, leading to measurable independence (clients able to send photos, manage emails, and stream content without outside help).
- Manages a simple website and knowledge tools to support future growth opportunities -- www.redglenelectronics.com
